The minimum spend must be achieved on the same day. Purchases over more than one day are not eligible for this free gift.

**How to use your customization kit**

- The patches are stickers for textiles and accessories with smooth surfaces. Their glue is meant to stick and stay in place. If the patches are moved or removed (accidentally or deliberately) the glue may leave a residue on, or cause damage to, the surfaces you attach them to. The patches may not stick to rough surfaces.
- Do not permanently expose the patches to excessive heat, sunlight or extreme cold. If the patches are not being used, store them in their packaging in a cool dark place.
- When you decide to use the patches: choose a position on the garment or product you want to personalise, then peel off the patch’s backing and stick it in place. Once in place, patches should not be repositioned as their glue may stop working and they could damage the garment or product if moved. If you wash the patches or put them in the tumble dryer they may become unstuck or get damaged or their colours may run and

may damage other items in the wash. If you want to make the patches permanent you can sew them into place.

- Do not give the patches to anyone under the age of three or anyone who might want to chew them. If you are a minor, do not stick the patches to anything without parental supervision and permission.

We reserve the right to (i) cancel this Promotion, (ii) cancel or refuse any individual's participation in the Promotion and (iii) amend these terms and conditions at any time (please check <https://www.larocavillage.com> for the most up-to-date version). These terms and conditions shall be governed by Spanish law and with respect to any controversy or discrepancy that may arise with respect to the Promotion, both parties with express waiver to our respective jurisdictions, will expressly and personally submit to the courts and tribunals of the city of Barcelona.
